

eXplore your potential

Are you tech savvy and interested in issues like supply chain and logistics? If the answer is yes, don't hesitate to jump-start your IT career at EDITEL, a hidden champion of supply chain optimization. Apply as a

Trainee in the area of IT (male/female)

Our traineeship offers the following benefits

In this challenging position, you will be part of a highly qualified infrastructure team that is in charge of running and optimizing our server infrastructure and ensuring that our applications run smoothly.

- › 1-year trainee program
- › A varied job in the following areas, depending on your focus:
 - o Infrastructure, agile software design/development and IT project management
- › After you have successfully completed the program:
 - o A position in line with your skills and interests
- › Work with innovative technologies such as Blockchain, Java, Oracle, Docker etc.
- › Opportunities for in-house CPD and collaboration in different areas

What you should have

- › Bachelor or master-level studies (with or without a degree) or industry-specific practical experience
- › An interest in a tech-oriented career in project management, software development or quality assurance
- › A high willingness to learn and a passion for IT structures and solutions
- › Proactive and solution-oriented work attitude
- › Good proficiency in written and spoken English
- › Friendly and communicative demeanor

What to expect from us

We offer a varied and international working environment amid the latest technology at the crossroads between logistics and Electronic Data Interchange (EDI) where dedicated employees can reach their full potential and take their career to the next level.
